Subject: Trinity Software

Angela,

First let me thank you for reaching out to our firm! Yes, we can integrate with Shopify provided they have the proper API Documentation and Support available. I know you may have many questions, so let's start here. We provide a complete software management solution for the Direct Sells and Network Marketing industry, with options that fit the needs of both startups and large successful companies. FIRESTORM® is designed to streamline every aspect of your business for rapidly growth and expansion. We have years of experience in this industry and have developed a feature backed shopping cart of our own which would be a component of your Trinity System saving you \$100s or \$1,000s in potential integration cost. You can view the Shopping Cart Live online by visiting one of our client's website:

<https://www.bevivi.com/home.aspx>

The cost of your project is based on your needs & requirements. There is no Nickel and Diming you, just a feature packed system which is arguable the most comprehensive and competitively priced in the industry right out of the box.

I would love to learn more about your project and be happy to answer any specific question that you may have! When would be a good time for a quick conversation?

Also, if you need anything, have any questions or concerns please feel free to reach out! I have access to many industry professionals who may be very helpful to you!

Warmest Regards,

Solomon McCluster
